Logo Usage

### Logo with base line

### Clear Space

We need to ideally maintain a clear space on all four sides of the logo equal to the height of the logo including the baseline as indicated.

The same rule applies when we do not need or use the baseline.

### Logo without base line

**PRINT**

**Logo with base line**

Minimum size of Logo

**Minimum Logo Size**

Always maintain the standard minimum size as specified here. Anything smaller will hamper the readability and will be redundant,

While using the logo without the baseline the minimum size can be smaller.

LOGO POSITIONING

## 1. Digital logo

The horizontal logo is the preferred choice for digital usage to ensure maximum visibility in small areas. Our preferred position of the logo is in the top left, but when content, context, and usability of your digital touchpoint restricts this (e.g., mobile), use your best judgment to achieve 'logo standout'.

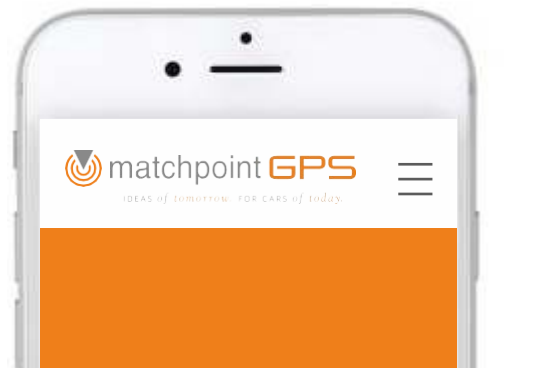

## 2. Favicon logo

Use in the browser tab only.

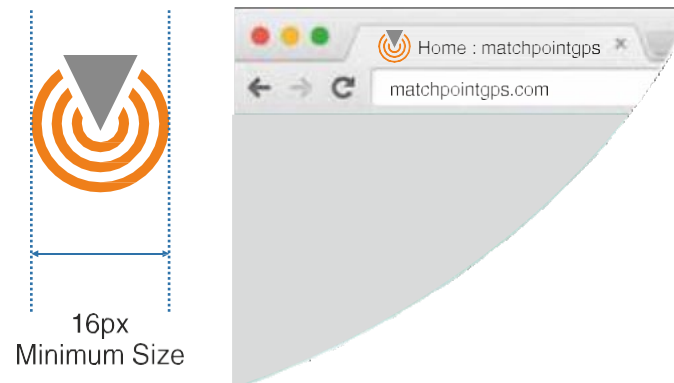

## 3. Mono version

Use when color production isn't an option
